

MAIN TITLE

"A CENTURY OF PROGRESS"
Part 2. ✓

Produced by Ford Motion Picture Laboratories
Released through Fitzpatrick & Mc Elroy
Copyrighted 1921 by Ford Motor Company

SUB TITLES

1. A century ago, the entire process of wool manufacture was performed in the home, from shearing the sheep to making the finished cloth into garments.
2. The way they used to shear the wool from the sheep.
3. The old fashioned spinning wheel.
4. Now, the process of manufacturing clothing has been split up into a hundred different trades, and most of the work is done by machines tended by women and girls.
5. In 1800 the women of the family "did" the family washing; in summer out under the trees; in winter in the great kitchen.
6. Now, we have electric washing machines and electric irons.
7. Or, we send ~~our~~ our clothes to the laundry.
8. Our grandmothers made bread in the kitchen in great stone ovens.
9. But now it is made at bakeries.
10. Development of water power is another factor in America's industrial progress.
11. In 1800 there were a few factories in New England using the natural waterfalls as power for turning wheels.
12. Today, dams are built which produce artificial waterfalls with from 1,000 to 100,000 horse power.
13. The Roosevelt Dam produces 92,000 horse power. It supplies cities and factories within a seventy-five mile radius with light and power.
14. America's industrial development has been due in part to her vast natural resources, and in part to her governmental system of protecting and fostering ~~a~~ industries and education.

(The End)
